SEMINAR NOTICE

Google Web Toolkit (GWT)

Date: August 16, 2013, 4PM   **Venue: Seminar Room**

Speakers: Varun, Rohan and Ankit (MCA Final Year)

Google Web Toolkit (**GWT)** is an **open source** set of **tools** that allows **web developers** to create and maintain complex **JavaScript front-end** applications in **Java**. Other than a few native libraries, everything is Java source that can be built on any supported platform with the included GWT **Ant** build files. It is licensed under the **Apache License** version 2.0.**[1]**

GWT emphasizes reusable, efficient approaches to common web development tasks, namely asynchronous remote procedure calls, history management, bookmarking, UI abstraction, internationalization, and cross-browser portability.
