

## **SEMINAR NOTICE**

"Docker" -- An open platform for distributed applications for developers & sysadmins.

**Speaker:** Srinivas Jandhyala, IBM Analytics

**Date: 06-11-2015, Time: 4 PM**

**Venue: C. V. Raman Auditorium**

"Docker" is a virtual partitioning technology that allows application images be directly hosted on it and ported across different virtual partitions. You can distribute "Docker" images for recipient to directly install and run them.
