Experience Synopsis

- 18+ years of experience in the areas Architecture, SOA, BPM, SDLC, and Enterprise Architecture
- Worked on multiple large scale applications in Telecom, Insurance & Banking domain
- Extensive working experience with SOA enabling technologies such as WebSphere Integration Developer, WebSphere Business Modeler, WebSphere Process Server, SeeBeyond, Oracle Service Bus (OSB) and Oracle SOA Suite. Also, gained knowledge in software engineering concepts – Agile and Six Sigma.

Professional Summary

- **TEG (Technology Excellence Group) setup and working:** Experienced in setting up enterprise wide TEG for SOA/BPM. As part of TEG, provided support to various accounts like Comcast, NexTel, VHA, Wataniya, etc. Also, successfully setup a enterprise wide IBM Integration Competency Center for Vodafone (India).
- **SOA/BPM projects:** Over the years participated in the full lifecycle of the development of SOA/BPM applications/integrations across the Telecom, Insurance and financial domains. A few clients of such SOA based applications are YBS, Comcast, NexTel and VHA.
- **Enterprise Architecture:** Provide strategic leadership, facilitation, and architectural guidance across a diverse range of SOA/BPM project technologies. Work closely with the technology partners (like IBM, Oracle) from across the enterprise to develop the IT strategy aligned with the business goals.

Key Initiatives (Past 5 years)

- **SOA based Architecture for Financial client** –SOA project design for YBS (Yorkshire Building Society, UK). Engaged in establishing the architecture principles and practices, processes for a large financial client. Migration of existing processes and integrations from legacy to Oracle Fusion based SOA platform.
- **Strategic Services Platform for a Telecom company** – NexTel has Telecom operations across North and South America. Engaged in defining various views of the architecture, frameworks and service taxonomy. Provided information to the team during design, development, deployment
- **Strategic Architecture Roadmap** – GWL (Great West Life), provides group insurance products. It required to revamp the aging IT applications and processes to align with the change in business strategy. Was engaged in establishing a architecture roadmap with an eye towards alignment with long term business strategy.
- **Vodafone (India) SOA/BPM Practice:** Responsible for the setup of the COE for SOA/BPM practice at Vodafone (India). Developed best practices and frameworks for SOA based integration solution development using IBM products like WebSphere Integration Developer, WebSphere Process Server.
